

STOP URBAN PRESSING ON COLLSEROLA NATURAL PARK

CITIZENS OF BARCELONA METROPOLITAN AREA WELCOME the IUCN World Conservation Congress which gathers more than 8,000 world's leading decision makers together to debate, share, learn and commit for a diverse and sustainable world and to protect biodiversity around the world.

BUT, while discussions are taking place, in Barcelona metropolitan area, LOCAL AND REGIONAL ADMINISTRATORS FAIL TO PROTECT our COLLSEROLA NATURAL PARK. If you turn your eyes to the upper part of the city you will discover a big forest of 9000 hectares (22000 acres) in the heart of our metropolitan area, no other city in the world has such a big natural park in the middle of 4 millions of people. Most of the space of the park is supposedly protected under Natura 2000 programme of the European Union. COLLSEROLA PARK IS SUFFERING AN INCREASING PRESSURE OF SURROUNDING URBAN AREAS.

REGIONAL AND LOCAL ADMINISTRATIONS DELAY DECLARING PROTECTING LAWS for Collserola Natural Park. Local administrators meanwhile profit to build a roller coaster in the heart of the park with public money only for an economic purpose by cutting unique trees and regional administrators are planning to pierce the natural park with motorways, tunnels and big developments. The result is a big loss of wildlife, natural spaces and ecosystem degradation for future generations.

We, citizens of Barcelona metropolitan area, do not want only meetings and workshops but protecting laws.

No more motorways, no more tunnels, no more buildings in Collserola natural park. Respect citizen's decisions: protect the park.

LET'S SAVE COLLSEROLA NATURAL PARK TOGETHER.

Plataforma Cívica 
per a la defensa de **Collserola**
